Cleanliness drive in Breeding Lab at Cummings Laboratory

Cleanliness drive in breeding lab located besides the Cumming’s Laboratory, Pusa Campus, New Delhi was done on 31st January, 2019. In the drive, 16 staff participated from Delhi office of IIMR.

During the cleanliness drive in the breeding lab materials like mixture of grains and seeds, grains, seeds that are heavily infested with storage insects as well as fungus were scrutinized and placed properly. The floor, roof, windows etc were cleaned properly.

Breeding Lab before the Cleanliness Drive

The properly arranged carton box with infested seeds and grains, mixtures is given in the below picture.

The place near the cold storage module was also cleaned properly for easy access to the instrument.
